TB Title: Importing Certificates - Locating the Netscape Keystore File		
System (Subsystem): IWS 2.1 Client Components (Solaris)		
CRs: 3609	Media: N/A	Version: IWS 2.1
<p><u>Situation:</u></p> <p>When attempting to import a Certificate from the Netscape Keystore, as described on page 20 in Step 2 of the InfoWorkSpace 2.1 User's Guide – December 2000, the user cannot "browse" to the Netscape Keystore file (key3.db) because it resides in a hidden directory. The Java File Chooser does not display hidden directories.</p> <p><u>Solution:</u></p> <p>When the Java File Chooser comes up, it defaults to the user's home directory. Typing ".netscape" into the "File name:" text field, then hitting "Enter" browses down into the ".netscape" directory. This displays the key3.db file, which the user may select as normal. The user may then proceed to the next step.</p>
