TB Title: InfoWorkSpace LaunchPad 1.5.2 icon gets overwritten by LaunchPad 2.1 icon.		
System (Subsystem): Windows NT/2000		
CRs: None	Media:	Version: IWS 2.1
<p><u>Situation:</u> When installing the InfoWorkSpace LaunchPad 2.1 client on a system, which already has a LaunchPad 1.5.2 client, the LaunchPad 1.5.2 icon gets overwritten with the LaunchPad 2.1 icon. They have the same name. Therefore, if you want Desktop access, you must create a shortcut and choose a different icon in order to launch the LaunchPad 1.5.2 executable.</p> <p><u>Solution:</u> To preserve the original LaunchPad 1.5.2 icon, do the following BEFORE installing InfoWorkSpace LaunchPad 2.1:</p> <ol style="list-style-type: none"> 1. Go to Desktop. 2. Right click on the LaunchPad (1.5.2) icon and select Rename. 3. Change filename to something other than LaunchPad (ie, LP 152) and press Enter. 4. Proceed with installation of InfoWorkSpace LaunchPad 2.1.
