TB Title:

Conference Center Administration is disabled by default in the 2.5.1 Release.

Platform:

Both

Change Request(s)

6210

Category(s)

PlaceWare Conference Center

Version:

InfoWorkSpace 2.5.1

Synopsis:

In the InfoWorkSpace v2.5.1 release, PlaceWare Conference Center Administration is disabled by default. Error messages are received when you try to access Conference Center Administration from the browser and from within the client.

Solution:

1. Enable the PlaceWare Conference Center by editing the property “placeware.allowedClients” located in the placeware/data/properties file. By default, this is set to the IP address (or hostname) of the server. Add any additional IP addresses/hostnames to this property, in comma-delimited format, to enable Conference Center Administration for your InfoWorkSpace client. The use of wildcard characters (“*”) in the hostname of IP address is supported.
2. Restart PlaceWare.
