Change Request: NA

**Title:** Oracle Critical Patch Update January 2006 – CPUJAN2006

Platform	Version	Operating System	Category
IWS Servers	2.5.1.2	Windows and Solaris	Oracle

**Description:**

A Critical Patch Update is a series of patches for potential security vulnerabilities discovered in Oracle Database Server.

The Oracle CPUJAN2006 is a cumulative patch that supersedes all patches between 8.1.7.4.9 and 8.1.7.4.25

**Action:**

1. Oracle must already be patched to 8.1.7.4.9 or greater.
2. Download Oracle patches from the Oracle Support Services web site, MetaLink at <http://metalink.oracle.com>. This requires your own Oracle MetaLink user account.
3. Install CPUJAN2006 using the instructions in the attached readme file. [https://www.ezenia.com/downloads/Tech\\_Bulletins/oracle\\_CPUJAN2006\\_readme.txt](https://www.ezenia.com/downloads/Tech_Bulletins/oracle_CPUJAN2006_readme.txt).
