

# Ezenia! InfoWorkSpace

Technical Bulletin TB06-003B

Change Request: 9303

**Title:** Placeware Provided Jar Files Expiring May 2006

Platform	Version	Platforms	Category
IWS Servers	2.5.x/3.x	Windows	Placeware

**Description:**

Specific IBM JCE jar files render an IWS server unusable due to expired certificates.

The following files with expiring certificates on Thursday, May 18, 2006 (15:59:19 MDT) are:

- IBMJCEProvider.jar
- IBMJCEfw.jar
- ibmjsse.jar

InfoWorkSpace 2.5.x is affected when performing an initial install of 2.5, applying 2.5.1, or re-installation of Placeware when configuring SSL.

InfoWorkSpace 3.x is only affected when performing a re-installation of Placeware when configuring SSL.

**Action:**

1. Shutdown Placeware service on the affected server.
2. Remove the listed files from the \placeware\etc\java\lib\ext directory.
  - IBMJCEProvider.jar
  - IBMJCEfw.jar
  - ibmjsse.jar
3. Download the “Server and Client Activation Kit Zip File” from [www.ezenia.com](http://www.ezenia.com) under the InfoWorkSpace Support option. The download will be listed under version 2.5.1.3. Unzip these files and copy them to the \placeware\etc\java\lib\ext directory on the server. The files only need to be copied to this one location. Nothing needs to be done on the clients.
4. Start the Placeware service.
