Technical Bulletin TB06-007

Change Request: NA

**Title:** Oracle Critical Patch Update January 2006 – CPUJAN2006

Platform	Version	Category
IWS	3.0	Oracle

**Description:**

A Critical Patch Update is a series of patches for potential security vulnerabilities discovered in Oracle Database Server.

This is not a complete software distribution and you must install it over an existing 9.2.0.7 Oracle Server installation.

This patch is a server only patch, and should only be installed on an InfoWorkSpace 3.0 Server.

**Action:**

1. Download CPUJAN2006 from the Oracle MetaLink web site.
2. Install CPUJAN2006 using the instructions in the attached readme file.  
[https://www.ezenia.com/downloads/Tech\\_Bulletins/oracle\\_CPUJAN2006\\_30\\_readme.txt](https://www.ezenia.com/downloads/Tech_Bulletins/oracle_CPUJAN2006_30_readme.txt)

Download Oracle patches from the Oracle Support Services web site, MetaLink at <http://metalink.oracle.com>. This requires your own Oracle MetaLink user account.
