Change Request: NA

Title: Oracle Critical Patch Update April 2006 for IWS 2.5.x – CPUAPR2006

Platform	Version	Category
IWS	2.5.x	Oracle 8i

Description:

A Critical Patch Update is a series of patches for potential security vulnerabilities discovered in Oracle Database Server.

This is not a complete software distribution and you must install it over an existing 8.1.7 Oracle Server installation.

This patch is a server only patch, and should only be installed on an InfoWorkSpace 2.5.x Server with Oracle 8.1.7.4 installed.

Action:

1. Download CPUAPR2006 from the Oracle MetaLink web site at <http://metalink.oracle.com>. This requires your own Oracle MetaLink user account.
2. Install CPUAPR2006 using the instructions in the attached readme file. https://www.ezenia.com/downloads/Tech_Bulletins/oracle_CPUAPR2006_25_readme.txt
