Technical Bulletin TB07-003

Change Request: NA

Title: 9.2.0.8 Patch Set for Oracle Database Server

Platform	Version	Operating System	Category
Server	3.0	Windows & Solaris	Oracle

Description:

Oracle patch sets provide bug fixes discovered in the Oracle Database.

This is not a complete software distribution and you must install it over an existing 9.2.0.7 Oracle Server installation.

This patch is a server only patch, and should only be installed on an InfoWorkSpace 3.0 server.

Action:

1. Download p4547809 from the Oracle MetaLink web site at <http://metalink.oracle.com>. This requires your own Oracle MetaLink user account.
2. Install 9.2.0.8 using the instructions in the attached readme file. https://www.ezenia.com/downloads/Tech_Bulletins/oracle_9208_readme.txt
