**Technical Bulletin TB07-006**

**Change Request: NA**

**Title:** Oracle Critical Patch Update January 2007 – CPUJAN2007 for 2.5.x

Platform	Version	Operating System	Category
Server	2.5x	Windows & Solaris	Oracle

**Description:**

A Critical Patch Update is a series of patches for potential security vulnerabilities discovered in the Oracle Database Server.

This is not a complete software distribution and you must install it over an existing 8.1.7 Oracle Server installation.

This patch is a server only patch, and should only be installed on an InfoWorkSpace 2.5.x Server with 8.1.7.4 installed.

**Action:**

1. Download CPUJAN2007 from the Oracle MetaLink web site at <http://metalink.oracle.com>. This requires your own Oracle MetaLink user account.
2. Install CPUJAN2007 using the instructions in the attached readme file. [https://www.ezenia.com/downloads/Tech\\_Bulletins/oracle\\_CPUJAN2007\\_25\\_readme.txt](https://www.ezenia.com/downloads/Tech_Bulletins/oracle_CPUJAN2007_25_readme.txt)
