

# Ezenia InfoWorkSpace

**Technical Bulletin TB07-008**

**Change Request: NA**

**Title:** Oracle Critical Patch Update April 2007 – CPUAPR2007 for 3.0

Platform	Version	Operating System	Category
Server	3.0	Windows & Solaris	Oracle

**Description:**

A Critical Patch Update is a series of patches for potential security vulnerabilities discovered in the Oracle Database Server.

This is not a complete software distribution and you must install it over an existing 9.2.0.8 Oracle Server installation.

This patch is a server only patch, and should only be installed on an InfoWorkSpace 3.0 server.

**Action:**

1. Download CPUAPR2007 from the Oracle MetaLink web site at <http://metalink.oracle.com>. This requires your own Oracle MetaLink user account.
2. Install CPUAPR2007 using the instructions in the attached readme file. [https://www.ezenia.com/downloads/Tech\\_Bulletins/oracle\\_CPUAPR2007\\_30\\_readme.txt](https://www.ezenia.com/downloads/Tech_Bulletins/oracle_CPUAPR2007_30_readme.txt)
