Title: Logging on to the SunONE Console 5.2 on an InfoWorkSpace Version 3.0 Server

Platform	Version	Category
Windows & Solaris	3.0	Server

Description:

Trying to log on to the SunONE Console 5.2 on an InfoWorkSpace 3.0 server installed with SunONE Directory and SunONE Web Servers results in a 500 or 401 Error.

Action:

The directory server console cannot authenticate the user because it cannot find the necessary files.

To resolve authentication issue:

1. Navigate to the \sunOne\servers\bin\https\bin directory.
2. Copy the nsldap32v50.dll and nsldapssl32v50.dll files to the \sunOne\servers\bin\admin\admin\bin directory.
3. Open iPlanet Console:
 - Solaris:
 - a. Open a terminal window
 - b. Change directory to the SunOne directory (cd /opt/sunOne/servers)
 - c. Type: ./startconsole
 - Windows:
 - a. From the left-side of the taskbar, click Start
 - b. Select Programs > Sun ONE Server Products > Sun ONE Server Console 5.2
4. Enter admin in the User ID field.
5. Enter the privileged user password in the Password field.
