Technical Bulletin TB08-006 Change Request: 9782

Title: If the Oracle account uses `bash` by default, scripts initiated by `su - oracle -c "..."` fail.

Platform	Version	Operating System	Category
Solaris	3.0.6	Solaris 8	Patch Process

Description:

If the Oracle account is configured to use the `bash` shell by default, scripts initiated by root by the command `su - oracle -c "..."` fail to install, with messages that Oracle is not available.

Action:

Use `sh` as the default shell.

Note: Only Solaris 8 is affected. You can use `bash` as the default shell for Solaris 9 and Solaris 10 without problems.
